What For?

- Watch & record TV (analog and DVB)
- Watch videos (DVD Video, DivX/XviD, MPEG1/2...)
- Listen to music (MP3, Ogg/Vorbis...)
- Watch pictures (e.g., from a digital camera)
- Play video games (e.g., MAME)
- Videoconference

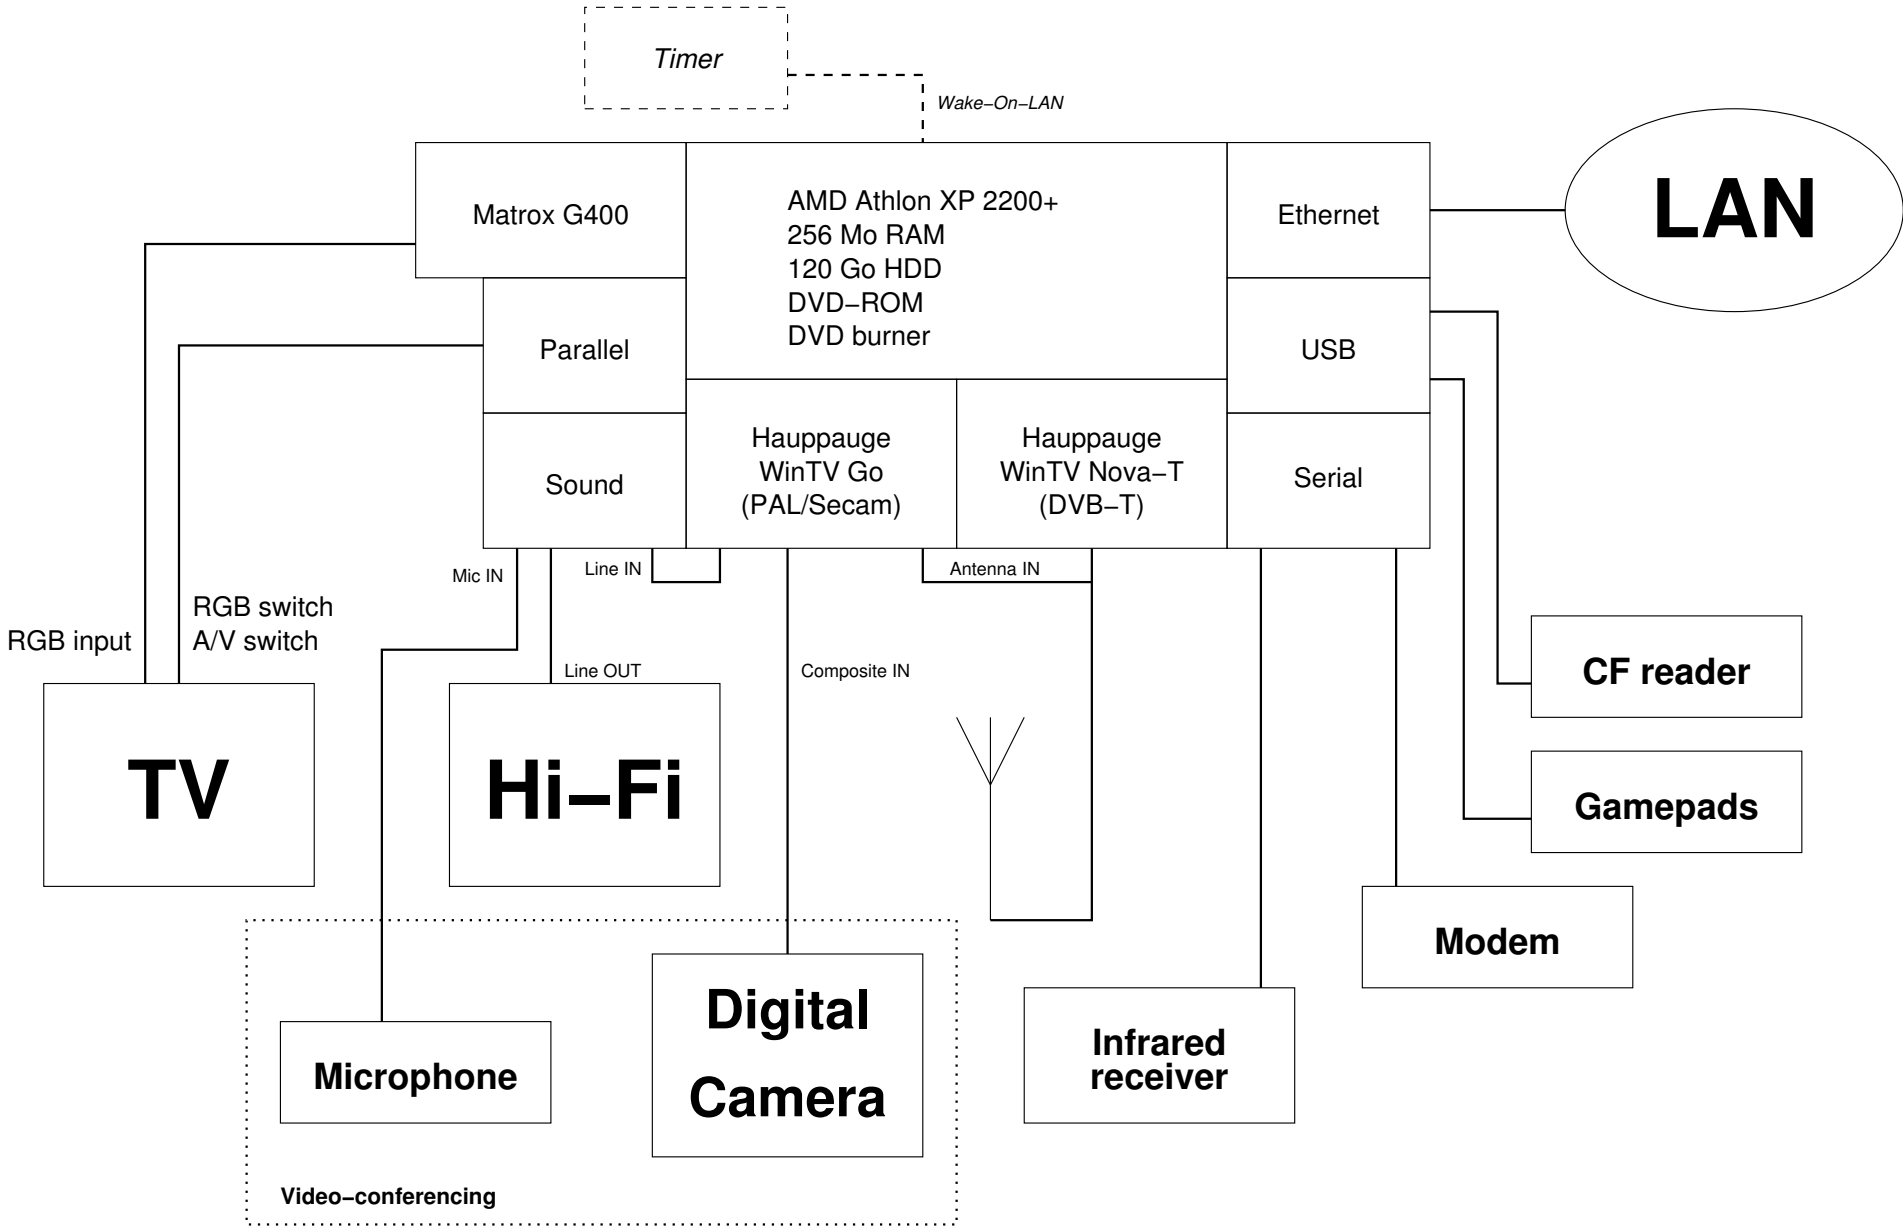

TV Recording

- Electronic program guide (EPG) with XMLTV (source: yle.fi or katso.fi)
- Scheduling based on the EPG:
 - single program recording
 - repeated recordings based on the program's name
- Safety time-padding (start recording 5 min earlier than EPG time, stop recording 5 minutes later)
- Automatic TV commercial detection when recording, skipped when watching (based on black frames)

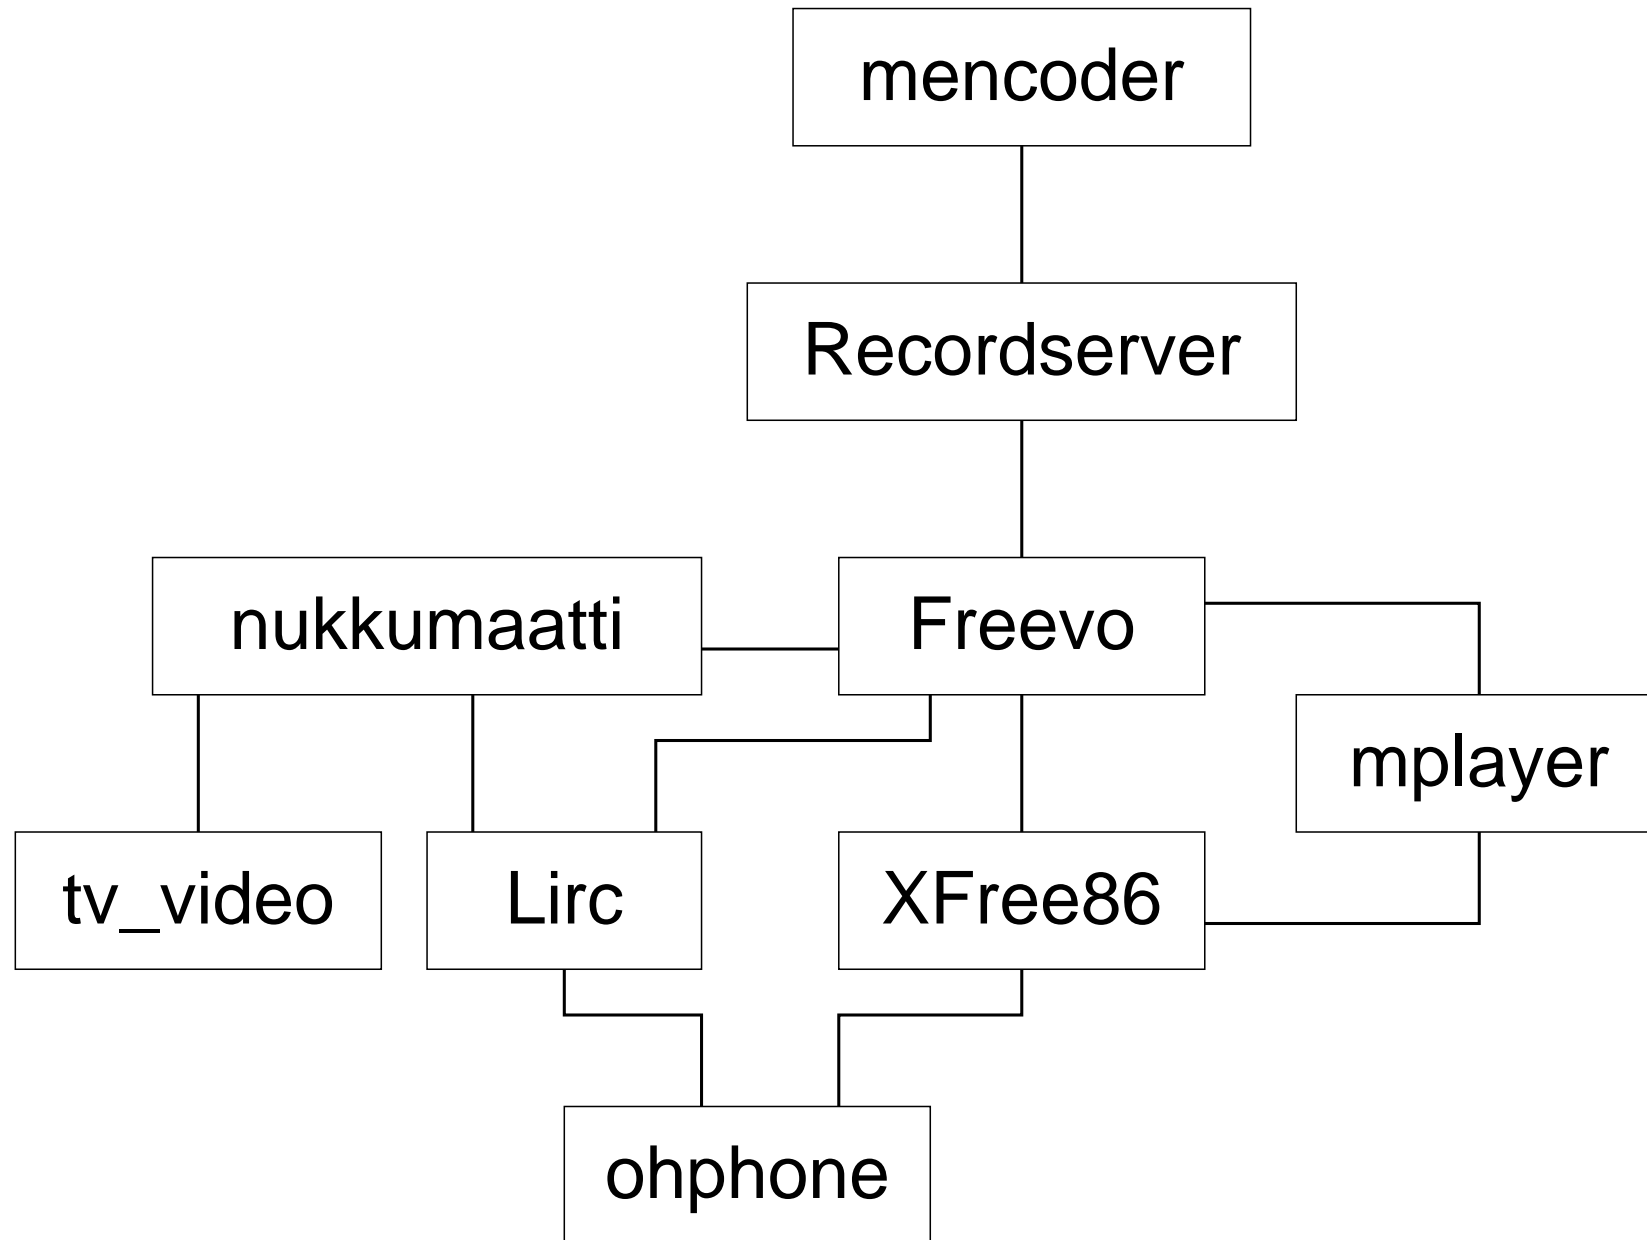

User Interfaces

- On-Screen Display (OSD)
 - User interface on TV
 - Infrared remote control
- Web interface
 - Only for scheduling and managing disk space
 - Possibly accessible from all over the World

Hardware Configuration

Software Configuration

Conclusion

- Used daily since 2004 (including while away on holidays)
- Features matching **my** needs
